HA7

Slim, Full Featured — Low Energy Operator

The Record HA7 transforms virtually any interior door from manual to modern.

Due to its smaller size profile, the HA7 has the ability to fit within tighter door frame spaces, expanding potential applications.

The HA7 is easy to install, with the option of simply plugging into a standard 120-vac wall outlet. The app (available on both Google Play and Apple stores) walks you through the setup process and also serves as a useful tool for hands-free control. Close, open, hold, lock and much more with the touch of a finger.

Available in clear or dark bronze anodized finishes, the HA7 requires less energy and is an eco-friendly option for single doorways while still meeting functional requirements.
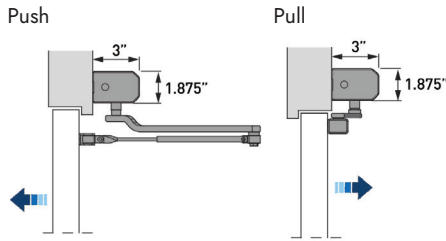

### Complies with the following standards.

ANSI/BHMA A156.19, UL325/UL10C.
